4. BACKGROUND INFORMATION

LANGEBERG
MUNISIPALITEIT MUNICIPALITY MASIPALA

In terms of section 15(2) of the National Environmental Management: Air Quality Act, 2004 (Act 39 of 2004) each municipality must include in its Integrated Development Plan (IDP), contemplated in chapter 5 of the Municipal Systems Act, an Air Quality Management Plan (AQMP).

The Constitution of the Republic of South Africa (Act 108 of 1996) provides the legal basis for allocating powers to different spheres of government and thus, institutional regulation of pollution. The Bill of Rights provides that everyone has the right to an environment that is not harmful to their health or well-being. The objectives of the National Environmental Management: Air Quality Act AQA, (Act 39 of 2004) are to protect the environment by providing reasonable measures to protect air quality and to prevent air pollution, and to give effect to Section 24 (b) of the Constitution.

The Air Quality Act promotes a holistic approach of an air quality management system while the air quality management system provides a framework for managing air quality while an AQMP applies this theory in an operational manner. An AQMP is one component of the overall Air Quality Management System.
The AQMP should be established with specific air quality goals in mind. Integration, alignment and cognizance of other policy and strategy initiatives must be taken into account.

5. PROBLEM STATEMENT

Langeberg Municipality adopted a 1st Generation Air Quality Management Plan in 2016. The National Framework proposed a review and renewal every 5 years. The renewal is now due. Each town in the Langeberg region is unique with unique air quality challenges. Air pollution has the potential to impact upon economic development in the Langeberg Municipal area.

6. PURPOSE

The Municipal System Act (No 32 of 2000) requires that all municipalities prepare an Integrated Development plan (IDP) through an integrated planning process to give effect to the Bill of Rights in the Constitution. The Langeberg municipality`s IDP has identified air quality as a priority focal area. As such the AQMP will address air quality over a five-year planning and financial period to align itself with the IDP.

The aim of the project is to review and update the Langeberg municipality current Air Quality Management Plan and to develop a 2nd generation AQMP.

The revised AQMP will provide steps towards improving and managing air quality by liaising and networking with the relevant stakeholders, collating all existing relevant air quality information, establishing a baseline assessment, and prioritizing the way forward.

The Western Cape Provincial Department of Environmental Affairs and Development planning (DEADP) encourages the alignment and integration of the anticipated.

AQMP with the various Provincial Departments and their policies, strategies, and guidelines. These include but are not limited to those relating to sustainable development, planning, energy, climate change, transportation, waste management, health, urban edge, and spatial development. It is essential that the Langeberg AQMP is aligned with the Provincial AQMP as well as the Spatial Development Framework (SDF) of the municipality.
